BALE BUNDLER

2 MODELS TO CHOOSE FROM

D14 | E14

Which of our models suits you best?

Bundle your bales
as easy as possible

D14

COMPACTION CHAMBER

Built with less components but also ensures **high compaction of each bundle**
Compaction pressure is adjustable from the tractor cabin to suit each product's needs

BALE PUSHER

Pushes the bale into the chamber in a **swing movement** to guide bale entry and ensure alignment

BALE RETAINER

Works in a swing movement to hold 2 rows of bales

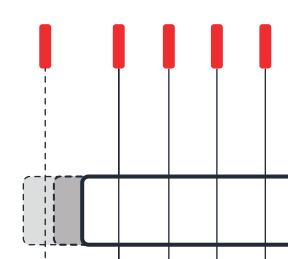

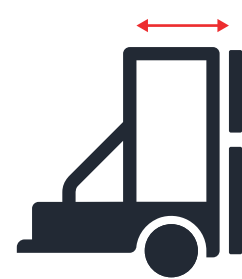

4 KNOTTER SYSTEM

Three or four twines can be used depending on bale length
3rd knotter: bales from 32-40 inches (80-90 cm)
4rd knotter: bales from 40-47 inches (100-120 cm)

PROGRAMMABLE CONTROL BOX

Performance is monitored using a **programmable automat with display**

Includes **sensor status check**

E14

Maximum compaction
& possibility to work with
3-string bales

ADJUSTABLE COMPACTION CHAMBER

Compaction that can be adjusted from 34-39 inches in width (87-100 cm) with a new clamps system

Possibility to reduce the total width of the bundle according to the product specifications or our customer's needs

REDESIGNED BALE PUSHER

Pushes the bale into the chamber in a **parallel movement** to apply more compression

Bigger size to increase contact surface with each bale and gain control

NEW BALE RETAINER

Works in a parallel movement to hold 3 rows of bales

5 KNOTTER SYSTEM

Additional knotter to added fixation of the bundle
4th knotter: bales from 32-40 inches (80-90cm)
5th knotter: bales from 32-40 inches (100-120 cm)

TOUCH SCREEN DISPLAY

Visual & user-friendly control system to accurately track the working cycle as bales are being picked up

Includes alert system with **trouble-shooting assistance** & possibility to **retrieve all recorded data**
